Questionnaire

2D Coverage Analysis

Company: _____

Contact name: _____

Address: _____

_____

Phone: _____

Email: _____

What is your need?

- **2D analysis of HCP coverage**

  ☐ by 2D Western Blot

  ☐ by Immuno Affinity Chromatography (IAC) and subsequent 2D DIGE analysis

- **☐ 2D analysis of HCP coverage using generic BioGenes` |360-HCP ELISA antibodies**

  E. coli|360 HCP ELISA:

  ☐ Type A
  ☐ Type B
  ☐ Type C
  ☐ Type D

  CHO|360 HCP ELISA:

  ☐ Type A
  ☐ Type B
  ☐ Type C
  ☐ Type D

- **☐ 2D analysis of HCP coverage using an external HCP ELISA antibody**

  Which: _____

  Antibody origin (species):_____

  ☐ Affinity purified ☐ Total IgG

  Concentration of the antibody solution:_____

  If known: Working concentration in Western Blot:_____

BioGenes GmbH
Koepenicker Str. 325, 12555 Berlin, Germany

Sample Information

- **Sample derived from the following host:**

  ☐ E. coli ☐ CHO ☐ Other, which: _____

- **Number of samples to be analyzed:** _____

- **Sample constitutes:**

  ☐ Cellular lysate ☐ Cell culture supernatant ☐ Purified protein solution

  Estimated protein concentration and method of determination:

  _____

  Buffer composition: _____

- **Sample represents:**

  ☐ Mock fermentation

  ☐ Process sample with drug substance:

  What kind of **drug substance** do you have (rec. protein, humanized antibody, …)?

  _____

  Can you provide an **anti-drug substance** antibody? ☐ Yes ☐ No

  Antibody origin (species):_____

  ☐ Affinity purified ☐ Total IgG
  ☐ Monoclonal ☐ Polyclonal

  Concentration of the antibody solution:_____

  If known: Working concentration in Western Blot:_____
